

PROFILE

Brownhill Investments Company Limited

Overview

Brownhill Investments Company Limited is a fully Nigerian-owned, **Multi-sector Oilfield Services Provider**. We offer integrated solutions across various domains, including marine logistics, engineering, energy, infrastructure, security surveillance, facility maintenance, and well intervention services.

With over two decades of industry experience and a strong understanding of Nigeria's operational landscape, our capabilities encompass both core and specialized services designed to address the evolving needs of the oil and gas sector.

As a subsidiary of the **Brownhill Group**, a diversified conglomerate active in key sectors of the Nigerian economy, we operate through strategic hubs in Lagos, Warri, and Port Harcourt. Additionally, our international presence is supported by our London office.

Strategic Presence

With a head office in Lagos and branches in Port Harcourt and Warri, we are strategically positioned near Nigeria's core oil production zones.

Our London office supports international procurement, inspection, sourcing, and technical training

CORE CAPABILITIES

1 Offshore Marine Support Services:

Supply Vessels: We operate a fleet of versatile supply vessels designed to efficiently support offshore platforms with essential provisions, equipment, and personnel. Our supply vessels are equipped to navigate complex offshore routes while maintaining high safety standards.

Cargo Vessels: Our cargo vessels facilitate the transportation of bulk materials, equipment, and supplies to and from offshore and coastal facilities, ensuring timely and secure deliveries.

We provide efficient and secure transportation of heavy-duty equipment, materials, and containerized goods to coastal and offshore destinations.

Key among our services is the provision of alternative crude oil evacuation solutions — a strategic response to pipeline constraints or emergencies. Our cargo vessels and barges are fully equipped to support shuttle operations between onshore loading points, floating storage units (FSUs), and offshore export terminals. These services ensure continuity of crude oil evacuation and monetization, especially in challenging terrains and remote production zones.

Security Surveillance: We provide advanced security surveillance solutions to safeguard maritime assets, personnel, and operations. Our systems include integrated monitoring, remote surveillance, and authorized security personnel deployment.

Barges & Self-Propelled Barges: Our range of barges, including self-propelled variants, are suitable for various lifting, transporting, and installation tasks in marine environments. They are adaptable for heavy lift operations, pipe laying, and general cargo handling.

Houseboats & Remote Accommodation: To support operations in isolated or offshore locations, we offer fully equipped houseboats and remote accommodation facilities. These units are designed to provide a safe, comfortable, and functional environment for personnel working in remote sites.

2 Geological Services

Well Intervention & Flow Assurance Services

Brownhill Investments Company Limited offers a comprehensive suite of Well Intervention Services, designed to enhance hydrocarbon recovery, ensure well integrity, and optimize production throughout the life of the well. Our services are executed by experienced personnel using industry-standard equipment and in alignment with strict safety and environmental protocols.

Well Intervention Services include:

Pumping Services: Provision of high-pressure pumping solutions for well stimulation, chemical injection, cement squeezing, and other remedial operations aimed at enhancing well productivity.

Nitrogen Lift Services: Application of nitrogen lifting techniques to unload wells and initiate flow, particularly in wells with low reservoir pressure or after completion operations.

Slickline Tubing Investigation: Deployment of slickline tools to perform downhole diagnostics, retrieve or set devices, and gather critical tubing data without the need for heavy intervention.

Bottom Hole Pressure (BHP) Surveys: Accurate pressure and temperature measurements at the reservoir level to support reservoir modeling, well performance monitoring, and production optimization.

Flowback Services: Controlled flowback operations to recover fluids, proppants, and debris post-stimulation or well testing, ensuring efficient cleanup and safe handling of effluents.

Surface Well Testing Solutions:

Our Surface Well Testing Solutions provide vital data to support reservoir evaluation, production allocation, and well performance monitoring. These services are executed using technically sound, safety-compliant, and field-proven equipment in partnership with Original Equipment Manufacturers (OEMs) and certified service partners. Our surface testing units are configured to handle a wide range of flow rates and compositions, ensuring accurate metering and sampling under various operational conditions.

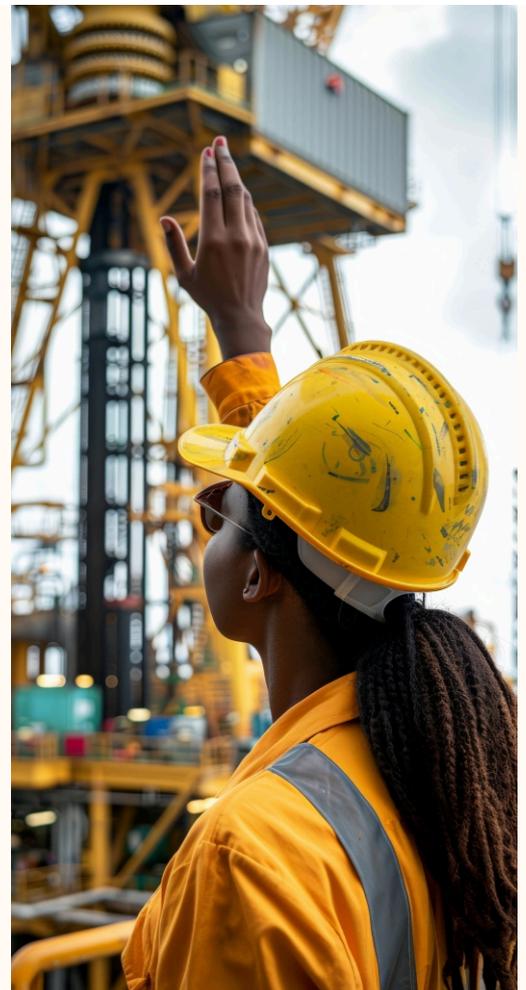

Flowline Maintenance Services

In addition to downhole and surface well services, we offer Flowline Maintenance Services to ensure the integrity, safety, and reliability of production and test flowlines. This includes routine inspection, cleaning, pressure testing, leak detection, corrosion inhibition, and repair works as necessary. Our proactive maintenance strategy minimizes downtime, prevents spills, and supports uninterrupted production operations.

Together, these integrated services ensure holistic well and surface facility management, enabling our clients to maximize asset value while meeting regulatory and HSE standards.

3 Facility Maintenance & Engineering Services

Brownhill Investments Company Limited provides end-to-end Facilities Maintenance and Engineering solutions designed to ensure asset longevity, optimal performance, and operational safety across industrial, commercial, and residential environments. Our multidisciplinary team of engineers and facility management professionals delivers tailored services in line with global best practices and client-specific requirements.

Core Areas of Expertise:

Civil, Mechanical, and Electrical Engineering Services:

We offer robust engineering support covering design, installation, inspection, and maintenance of civil structures, mechanical systems (e.g., HVAC, plumbing, rotating equipment), and electrical infrastructure (e.g., power distribution, lighting, and control systems). Our solutions enhance asset performance and ensure code compliance.

Preventive and Corrective Maintenance:

Through a structured maintenance management system, we implement both preventive and corrective maintenance programs. This includes routine inspections, planned servicing, parts replacement, and timely repairs to prevent breakdowns and prolong the lifespan of critical assets and infrastructure.

Emergency Preparedness and Operational Continuity:

We develop and maintain comprehensive emergency response protocols and business continuity plans. Our approach includes risk assessments, backup systems, quick-response teams, and scenario-based drills to ensure facilities remain operational during unforeseen events.

Janitorial, Housekeeping, and Facility Management Services:

We provide high-quality soft services such as cleaning, waste management, landscaping, pest control, and concierge operations. These are delivered by well-trained personnel, using environmentally friendly products and modern equipment to ensure a clean, hygienic, and welcoming environment.

Security and Space Planning Solutions:

Our integrated security services include physical access control, surveillance systems, guard services, and incident management. Additionally, we offer strategic space planning and utilization services to improve operational efficiency, accommodate growth, and enhance workplace safety and productivity.

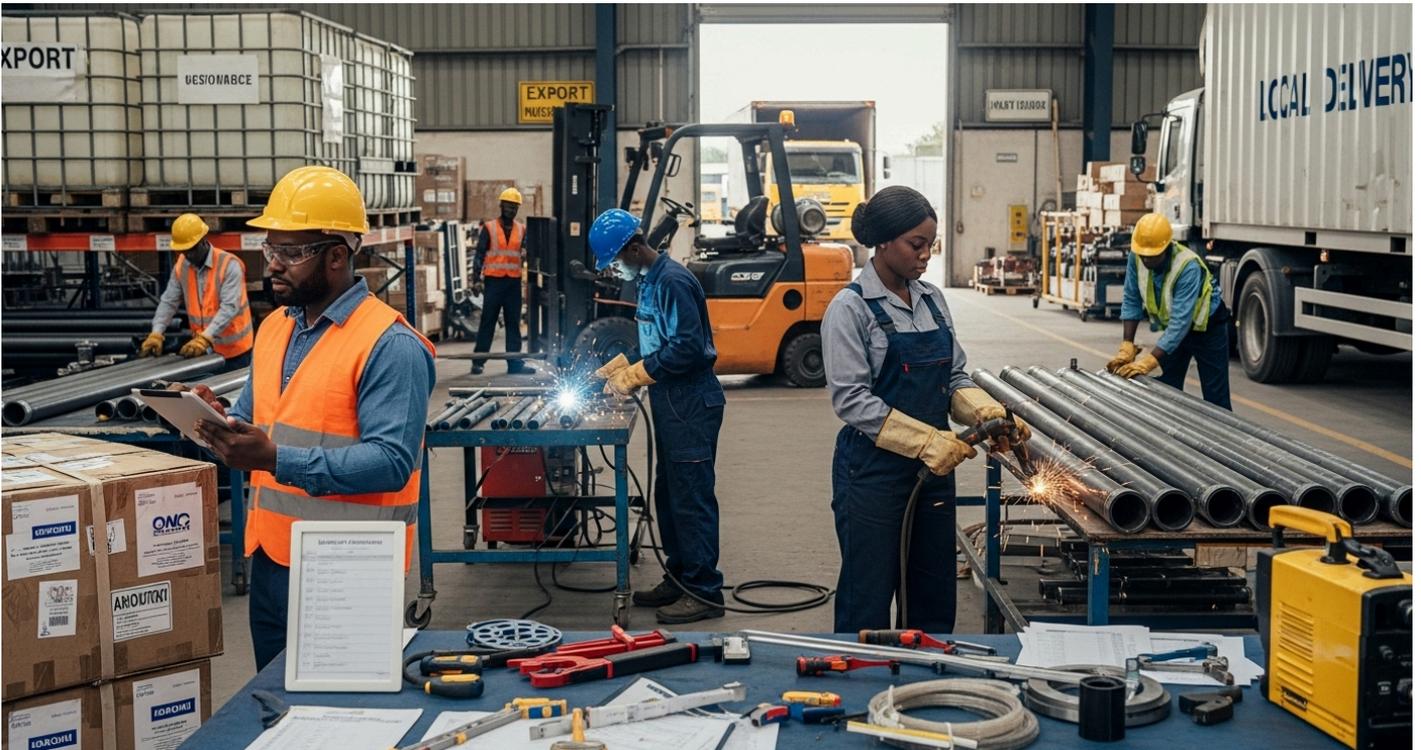

Our integrated approach to facilities maintenance ensures that our clients experience minimal downtime, reduced operating costs, and an environment that supports business continuity, productivity, and stakeholder confidence.

4 Procurement & Supply Chain Services

At Brownhill Investments Company Limited, we offer comprehensive Procurement and Supply Chain Management services tailored to meet the critical operational needs of clients across the oil and gas, energy, engineering, and construction sectors. Our service philosophy is built on reliability, efficiency, quality assurance, and cost-effectiveness.

Our key capabilities include:

- **Direct Sourcing from Global OEMs and Best-in-Class Manufacturers:** We leverage our robust global network to procure authentic, high-quality equipment, tools, and materials directly from Original Equipment Manufacturers (OEMs) and leading industrial brands. This approach guarantees product integrity, reduces procurement lead times, and minimizes the risk of counterfeit or substandard items.
- **Local Inspection and Quality Control to Ensure Compliance:** We enforce rigorous local and international quality control protocols through certified third-party inspections and in-house technical verification. Every procurement batch undergoes thorough documentation review, specification checks, material testing, and compliance validation to meet client and regulatory requirements.

- **Customized Fabrication and Corrosion Protection:** For non-standard or project-specific requirements, we provide bespoke fabrication solutions in steel structures, piping systems, skids, and mechanical components. Our corrosion protection services—such as sandblasting, coating, galvanizing, and cathodic protection—ensure durability and performance in harsh environments.

- **Complete Supply Chain Packages from Planning to Delivery:** We offer end-to-end supply chain solutions covering demand forecasting, inventory management, logistics coordination, warehousing, documentation, and last-mile delivery. Our integrated logistics model ensures that materials and equipment arrive on time, within budget, and in optimal condition—regardless of location or project complexity.

With our in-depth market intelligence, experienced procurement professionals, and strong vendor alliances, Brownhill is positioned as a trusted partner in delivering reliable supply chain solutions that support seamless project execution and uninterrupted operations.

5 Civil Infrastructure & Construction

At Brownhill, we bring a wealth of experience in delivering complex civil infrastructure and engineering projects across Nigeria. Our capabilities span from sports and recreational facilities to large-scale road construction and oil & gas civil support services. We are known for our quality, timely delivery, and collaborative approach to public and private sector projects.

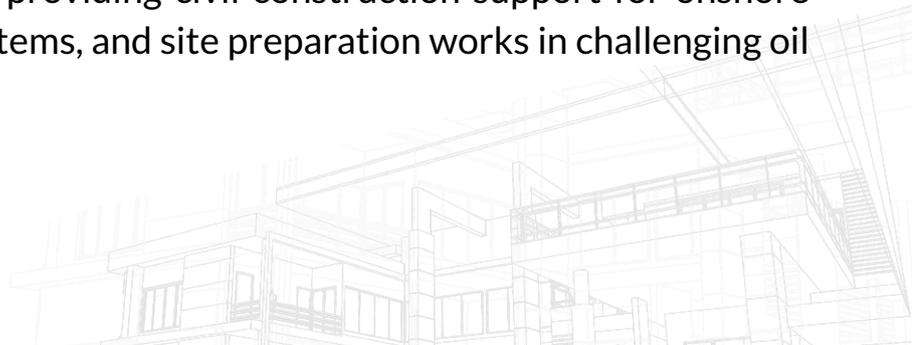

Key Highlights of Our Civil and Construction Portfolio Include:

- **Reconstruction of Ogbe Stadium, Benin City**

Delivered in partnership with Peculiar Consult, this flagship project involved the complete redevelopment of one of Edo State's most iconic sports arenas. The project encompassed structural works, spectator facilities, modern athletic amenities, and compliance with international standards for sporting venues.

- **Long-standing Civil Works Partnership with Chevron Nigeria**

As a trusted civil works contractor, Brownhill has maintained a consistent service relationship with Chevron Nigeria, providing civil construction support for onshore facilities, access roads, drainage systems, and site preparation works in challenging oil and gas environments.

- **State-Wide Road Construction & Civil Infrastructure Projects – Delta State Government**

We have successfully executed multiple road construction, rehabilitation, and urban infrastructure projects across Delta State. These include rural access roads, storm water drainage systems, culvert installations, and urban improvement schemes – all aimed at enhancing mobility and regional development.

Our Competitive Edge

1. Supply, Cargo, and Security Vessel Specialization: We operate a fleet of fully manned, purpose-built marine vessels specifically designed to navigate Nigeria’s most challenging offshore and coastal environments. Our vessels are optimized for security, cargo handling, and supply operations, offering unmatched reliability in oil and gas logistics and maritime protection services.

2. Group Strength: As a core subsidiary of the Brownhill Group, we leverage the multi-disciplinary expertise, operational depth, and financial strength of a well-established conglomerate. This enables us to deliver solutions that integrate seamlessly across marine logistics, engineering, construction, and asset management.

3. Integrated Solutions: Our service offering spans the full value chain—from procurement and logistics to construction, commissioning, and ongoing support. We provide clients with a single point of accountability, reducing risk and ensuring operational efficiency across project lifecycles.

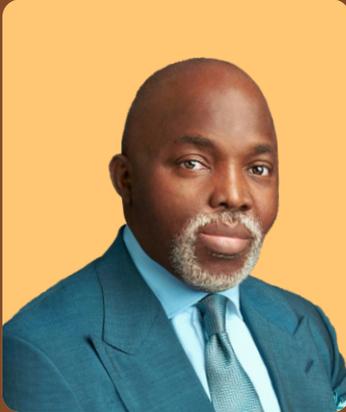

4. Local Presence, Global Reach: With operational bases strategically located in Nigeria’s major oil-producing regions, including the Niger Delta, and international procurement operations in London, we maintain a robust local presence while tapping into global markets to ensure cost-effective sourcing and world-class quality.

5. Local Content Leadership: We are a proud champion of Nigerian content development, consistently investing in the training, employment, and advancement of local personnel. Our operations reflect a firm commitment to building indigenous capacity, supporting community development, and aligning with the Nigerian Oil and Gas Industry Content Development (NOGICD) Act.

LEADERSHIP TEAM

Brownhill Group

AMAJU MELVIN PINNICK (OFR ROI)

Chairman / GCEO

A very intelligent and vibrant Nigerian entrepreneur, He is a global businessman with diverse interests in Onshore and Offshore Support Services, Construction and Engineering, Agriculture, Entertainment and Hospitality amongst others.

He is a 1994/1995 graduate of the Political Science and Public Administration Department of the prestigious University of Benin, Benin City.

The mastermind behind Brownhill Group, founded in 2001, Mr Pinnick's vision has been to develop Brownhill into a global conglomerate.

After recognizing the opportunity gaps in the various business sectors, he initiated Brownhill Group to bridge these gaps and has since partnered with major firms around the world to ensure the actualization of this noble vision.

Bemigho Wagbatsoma

Chief Operating Officer

Bemigho Wagbatsoma is a graduate of Economics and Statistics, with a Masters degree in energy and petroleum economics.

Bemigho is a strategic planner, intelligent business analyst, and the Chief Operating Officer (COO) at Brownhill Group.

Over the years, he has contributed to the growth of the group through the successful implementation and management of the various business endeavours.

In his role as Chief Operating Officer, he provides strategic input into all major decision-making processes with the responsibility for running the day-to-day operations of the group.

He is a seasoned economist with over twenty years experience, covering all aspects of organizational transformation, from strategy development and planning to process reengineering/review and organizational culture transformation.

Innocent Idoge

Chief Financial Officer

Seasoned and self-motivated Finance & Control Professional, a member of the Institute of Chartered Accountants of Nigeria (ICAN) with over 10 (ten) post qualification experience.

Master's and bachelor's degree holder in Accounting from the University of Benin with technical accounting background. He is detail-oriented, quality conscious, ethically-minded professional and a team player with diverse skills and expertise in Accounting, Finance, Auditing, Internal Controls and investigations.

He has over 10 (ten) years' experience in audit, accounting and review of accounting systems and controls of various organizations thereby contributing to the improvement of clients accounting and internal control systems.

LEADERSHIP TEAM

Brownhill Group

McDonald Wagbatsoma

Consultant Geologist

Mr McDonald Wagbatsoma is a 1990 graduate of Geology from the University of Benin, Benin City.

He also has a Masters degree in applied petroleum geology.

McDonald has over three Decades work experience in the Nigeria oil and gas industry haven been involved in some high profile deep water wells for Statoil and Chevron.

Other completed task includes geological field work on hydro geophysics and borehole completion, detailed description and petrographic analysis on conventional cores, Mudlogging and geologic data analysis of over 1,000 wells in the Niger Delta Basin from the upper land of the Delta to the deep waters of Nigeria.

Christopher Iyere

Group Executive Director - Southern Operations

Mr. Christopher Iyere provides visionary leadership and strategic oversight for Brownhill Investment Company Limited, directing all Southern Operations under the Brownhill Group umbrella.

His role encompasses overseeing project execution, stakeholder engagement, operational management, and regional business development. With a track record of excellence in organizational leadership and strategic growth.

Mr. Iyere plays a pivotal role in aligning the company's activities with the broader goals of the Brownhill Group while ensuring the consistent delivery of high-impact engineering and support services.

Omasan Pinnick

General Manager

Mr. Omasan Pinnick is responsible for the overall management of Brownhill Investment Company Limited. He oversees day-to-day operations, project management, client relations, and personnel performance to ensure the company maintains its reputation for quality and reliability.

His deep industry knowledge and hands-on leadership ensure the successful implementation of our services, operational efficiency, and continuous improvement across all departments.

Mr. Pinnick is instrumental in fostering a culture of professionalism, safety, and innovation throughout the organization.

Why Partner with Brownhill?

- Proven expertise in oilfield support, marine logistics, and facility services
- Unique ability to deliver secure, rapid-response vessel support in offshore and swamp zones
- Established operational capacity across the upstream and downstream sectors
- Aligned with NNPC's local content and value optimization goals
- Trusted by IOCs, NOCs, and state agencies for critical project execution
